Jekyll-Search

jekyll博客搜索插件

hexo博客搜索插件请前往 Hexo-Search

截图

也可以打开https://www.codeboy.me查看效果

操作

- 1. 点击右下角图标进行搜索
- 2. 双击ctrl键进行搜索或关闭
- 3. 搜索页面点击右上角关闭按钮关闭搜索试图

加入步骤

1. 将search目录放至于博客根目录下,其中search目录结构如下:

2. 在 _include/footer.html 中的 </footer> 后加入 cb-footer-add.html 中的内容即可。

注意事项

1.需要事先引入 jquery 与 bootstrap3(js与css文件) 框架,如果没有的话,操作如下:

在 _include/head.html 中引入以下代码:

```
<link rel="stylesheet" href="//cdn.bootcss.com/bootstrap/3.3.6/css/bootstrap.min.css">
```

在 _include/footer.html 中引入以下代码:

```
<!-- jQuery -->
<script src="//cdn.bootcss.com/jquery/2.2.2/jquery.min.js"></script>
<!-- Bootstrap Core JavaScript -->
<script src="//cdn.bootcss.com/bootstrap/3.3.6/js/bootstrap.min.js"></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script></script
```

bootstrap3-typeahead.min.js 的引入必须在 jquery.min.js 引入之后,即在 footer.html 中的行数更靠后!

- 2.默认联想8个,如果需要更多的话,请检索 bootstrap3-typeahead.min.js 中的 **items:8**,将 **8** 替换成自己需要的数值。
 - 3. 文章标题请不要使用回车等符号,回车等符号会造成json解析错误。

更新历史

v1.0.3

• 支持标题中含有双引号。

v1.0.2

• 添加错误console输出。

v1.0.1

• 增加firefox支持。

v1.0.0

• 支持jekyll中进行文章搜索。
